Gaps between the contigs
are represented as runs of N. The order of the pieces
is believed to be correct as given, however the sizes
of the gaps between them are based on estimates that have
provided by the submittor.
This sequence will be replaced

The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contins are represented as runs of N, but the exact sizes of the days are represented as fins econd will be updated with the traissed sequence as soon as it is available and the tensestes, uncher will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Insert size: 163000; agarose-tp

    arbitrary. Gaps between the contigs are represented as

            runs of N, but the exact sizes of the gaps are unknown.
            This record will be updated with the finished sequence
            as soon as it is available and the accession number will
            be preserved.
